

SPA - TREATMENTS – Epilation

In order to meet the expectations of our guests, we would like to offer a delicate system of waxes composed with the use of aromatherapy stimulating the senses.

Top-class products, combined with well-proven application techniques, allow you to perform almost painless epilation, removing stubborn hairs up to 1 mm in length.

For this reason, our epilation is especially recommended in removing hair from sensitive areas. The secret of reducing pain during epilation lies in the modern technology of wax production using titanium dioxide and the unique application of apricot kernel oil, jasmine and chamomile.

The oil creates a protective layer between the wax and the skin. Thanks to this, the wax peels off very gently and the pain while removing the hair is almost imperceptible.

The low melting point, flexibility and exceptional delicacy of our waxes provide nourishment and care for even the most demanding skin.

Finishing moisturising balm with herbal extracts soothes, reduces redness and moisturizes the skin after depilation.

Innovative waxes are a new approach to epilation.

It is a perfectly developed system so that the treatment is as effective and painless as possible.

- face - 60 PLN
- mustache - 35 PLN
- armpits - 60 PLN
- forearms - 55 PLN
- hands - 70 PLN
- shallow bikini - from PLN 80
- Brazilian bikini - from PLN 140
