

## SPECIALIST TREATMENTS

### MICROPRICKING

Micropicking is a modern way of treatment based on the principle of pricking the skin with automatically pulsating needles. Microneedles penetrate skin at 2 mm depth which further helps all active substances be applied into the skin.

With micropicking we stimulate all natural processes aimed at skin rejuvenation, thus bringing a superstructure of a new collagen and elastin together with a substantial growth of new blood vessels.

A micropicking course starts regenerative processes that perfectly help to block the effects of aging: wrinkles, lack of firmness as well as loss of facial contours. Scars, dehiscence, or stretchmarks can also be reduced. Micropicking together with correctly selected and applied products are an effective weapon in fighting against multiple defects.

Micropicking effects on:

- mimic wrinkles and deep wrinkles
- firming and lifting of the skin
- acne and enlarged pores
- skin hyperpigmentation and lightening
- bags and dark circles under the eyes
- skin thickening and deep hydration
- increasing the penetration of active ingredients
- induction of synthesis and collagen build-up
- surgical scars and acne scars
- cellulite and stretch marks
- alopecia and hair thinning
- skin laxity and local fat accumulation

*face, neck - 530 zł*

*face, neck, cleavage - 660 zł*

## NEEDLE MESOTHERAPY

Mesotherapy is a well-known and long-used method of skin rejuvenation and revitalization, which is gaining more and more customers every year.

One of the main advantages of mesotherapy is that the therapy is effective and natural. The essence of this treatment is to improve the quality, elasticity and hydration of the skin, thanks to which we gain the effect of alleviating facial features and nourishing, which in turn contributes to a fresh and young appearance.

It is a non-surgical method of improving the appearance of the skin by injecting small doses of nutritional medicinal substances.

### Indications for needle mesotherapy:

- biorevitalization
- facelift
- firming
- moisturizing
- skin nourishment
- skin aging prevention
- combating obesity symptoms such as loss of skin tension and stretch marks

### Advantages of needle mesotherapy:

- natural, non-surgical method
- long-lasting result
- the effects are visible after just one treatment
- delaying the aging processes
- eliminates dark circles under the eyes

Effective mesotherapy requires several treatments, the effects of which are really surprising. The condition of the skin improves significantly, small wrinkles disappear, deeper wrinkles become shallower. There is also a visible improvement in skin tension and firmness.

*Treatment price: from 550 zł*

## NEEDLE-FREE MESOTHERAPY

### Skinshooter

It is the most modern, non-invasive skin rejuvenation system. It is an alternative to classic needle mesotherapy. It uses the phenomenon of electroporation, which is based on the use of an electromagnetic wave. It reaches the interior of the skin, as well as through the cell membrane to the interior of the cell.

Immediately after the treatment, the skin is moisturized and toned, and a reduction in the depth of wrinkles is also visible.

#### Treatment effects:

- hydration, oxygenation, improvement of skin microcirculation
- improvement of skin elasticity and density
- relaxation of the facial muscles
- reduction of dark circles under the eyes
- brightening of pigmented lesions, freckles
- reduction of redness
- reduction of skin contamination

#### In addition, the treatment has a long-term effect:

- counteracts water loss
- protects the skin from drying out
- counteracts the loss of skin tension and elasticity
- prevents the formation of wrinkles

The effect lasts, depending on the problem and skin type, from three to five weeks with one treatment. A series of treatments allows you to enjoy a beautiful appearance for many months.

*Price: 330 – 400 zł*

## **LASER THERAPY**

It is currently the most dynamic and considered the least invasive aesthetic medicine and cosmetology.

Laser treatments allow for quick and safe correction of facial and body skin imperfections. They remove excessive hair, wrinkles and discoloration in non-invasive way; close the blood vessels and rejuvenate the skin. Individually selected therapy will deprive us of complexes and allow us to enjoy our perfect appearance again.

Therapy with the E-light device is a guarantee of non-invasive, safe and proven treatments.

We offer laser treatments:

- photoepilation - permanent hair removal
- discoloration therapy
- vascular therapy - reduction of erythema
- skin photorejuvenation
- effective therapy for acne

The price depends on the treatment area.
